[Feature](#)

Localized Attributes and Searchability for CMS Pages

We have extended our CMS page solution to also include localized attributes such as name and HTML meta header information. In addition to that now a CMS page can be marked as searchable.

Affected Bundles

Major	Minor	Patch
- Cms 3.0.0	n/a	n/a

Documentation

You can find up-to-date documentation for CMS bundle here: [CMS](#).

Migration Guides

To upgrade, follow the steps described below:

- Apply every minor and patch:

```
composer update "spryker/*"
```

- Once that is done, upgrade to the new CMS major and its dependencies:

```
composer require spryker/cms:"^3.0.0"
```

You can find detailed migration guides here: [CMS - estimated time for migration is 10 minutes](#).

Improvements

Acceptance Tests for Travis

We provide an infrastructure where you can run acceptance tests on Travis. This allows to run tests isolated from development environment. Tests run in `devtest` using separate database, Redis and Elasticsearch. Each test restores its state. Current implementation uses demo data as snapshot for all tests. We also support PHP 7.1 now for this environment. Please use the latest [DevVM](#) as this includes multiple domains and environments.

Major	Minor	Patch
n/a	<ul style="list-style-type: none">- Application 2.7.0- Search 5.3.0	<ul style="list-style-type: none">- Availability 3.0.3- Library 2.6.1- Oms 5.0.2- Testify 2.3.2

Bugfixes

MailDependencyProvider Fix

`MailDependencyProvider` tried to add same extension more than once, which led to a bug in acceptance tests. We added a check which verifies whether or not the extension has been added already.

Affected Bundles

Major	Minor	Patch
n/a	n/a	- Mail 3.0.1

Editing User

Editing a user in Users Control was leading to an exception. This is fixed now.

Affected Bundles

Major	Minor	Patch
n/a	n/a	- User 2.0.6

Propel Wildcard Replacement

Previously the generated code applied wildcard replacement only for `LIKE`. With this release we deliver a fix to also apply the replacement for `ILIKE`.

Affected Bundles

Major	Minor	Patch
n/a	n/a	- Propel 2.3.8

Hardcoded URLs in ProductManagement

In ProductManagement bundle we had hardcoded URLs which is removed. Now the request is sent to the domain configured by the project.

Affected Bundles

Major	Minor	Patch
n/a	n/a	- ProductManagement 0.1.2

Required Fields for Customer Address

The customer address form had missing constraints for required input. This is fixed now.

Affected Bundles

Major	Minor	Patch
n/a	n/a	- Customer 3.0.2
